

## A B S T R A C T

AN ANGIOGRAPHIC SYRINGE SUPPORT DEVICE AND COMBINATIONS  
COMPRISING THE DEVICE TOGETHER WITH AN ANGIOGRAPHIC  
5 SYRINGE AND AN ANGIOGRAPHIC INJECTOR

The support device (3) is adapted to be secured to  
the front face (4) of the injector, and to position an  
angiographic syringe (1) having a body (7) that presents  
10 an outwardly-directed projection (30), the cross-section  
of the body at the location of said projection being non-  
circular. The device which is extended forwards by a  
cradle (23) for supporting the syringe body, includes an  
upwardly-open recess (24) that presents firstly a non-  
15 circular cross-section that is complementary to a portion  
of the cross-section of the syringe body at the location  
of said projection, and secondly an abutment front face  
for said projection. The recess (24) includes a central  
portion (31) of circularly-arcuate cross-section, which  
20 portion is extended by two diametrically-opposite notches  
(32).
